

# Labour Party Campaign Report

## End the Tories ineffective and inhumane badger culls

The Tory Government decided to go against the Independent Expert Panel which found the first year of pilot culls in 2013 were neither effective nor humane. Tory Government reply to the independent panel was to disband the panel. David Cameron and the Tory Party are only interested in keeping their Tory farmers happy. Only a Labour Government will end the disastrous badger culls and put scientific evidence at the heart of policy.

## Defend the Hunting ban

Ten years ago the Labour Party in Government ended the cruel practice of hunting with dogs. I believe that the unnecessary and prolonged suffering of defenceless animals has no place in civilised society. The hunting ban is a testament to the progress made since the days of bear baiting and other such barbaric blood sports. The Tory manifesto has promised to hold a vote in parliament to bring back hunting with dogs. David Cameron has repeatedly stated his opposition to the Hunting Ban.

**Stag Hunting banned**

**Fox Hunting banned**

**Hare Coursing banned**

**Only Labour can protect the Hunting Act because Labour is the only major political party committed to defending it.**

## Ban the use of wild animals in circuses

Travelling Circuses are no place for wild animals. Being moved from place to place in cramped and substandard enclosures, forced training and performance, loud noises and crowds of people are the unavoidable distressing realities for animal in circuses. The Tory/Liberal Government promised to ban it then did nothing.
